PROFESSIONAL SUMMARY

Flutter Developer with **3 years of experience** in Mobile Application Development, Software Engineering, and Cross-Platform Application Development using Flutter SDK and Dart. Experienced in Firebase (Firestore, Authentication, Storage), REST API Integration, GetX, Provider, and Clean Architecture. Proven ability to design, develop, test, and deploy scalable Android and iOS applications. Skilled in Agile Development, State Management, UI/UX Implementation, Performance Optimization, and Cloud-Based Mobile Solutions.

CORE COMPETENCIES

Flutter Development, Dart Programming, Firebase Integration, REST API Integration, Mobile Application Development, State Management (GetX, Provider, Bloc), Clean Architecture, UI/UX Development, Performance Optimization, Cross-Platform Development, Agile/Scrum, Git & GitHub

TECHNICAL SKILLS

Languages: Dart, Python

Mobile Development: Flutter SDK, Mobile Application Development, Cross-Platform Development, Responsive UI Design

State Management: GetX, Provider, Bloc

Backend & Database: Firebase Cloud Firestore, Firebase Authentication, Firebase Storage, Realtime Database, RESTful APIs, JSON, HTTP

Architecture: MVC, MVVM, Clean Architecture, Repository Pattern, Dependency Injection, SOLID Principles

Tools: Git, GitHub, Android Studio, VS Code, Postman

Testing: Unit Testing, Widget Testing, Flutter Test

Deployment: Google Play Store Deployment, App Store Deployment, CI/CD

Methodologies: Agile/Scrum, SDLC

KEY ACHIEVEMENTS

- Delivered **4+** production-ready Flutter applications.
- Decreased application latency by **35%** through Firestore optimization.
- Improved app performance by **30%** using GetX state management.
- Accelerated booking confirmation time by **60%** in a car rental application.
- Eliminated appointment scheduling conflicts through automated slot management.

PROFESSIONAL EXPERIENCE

Flutter Developer – Flutter Studio | Jan 2024 – Present

- Planned, developed, tested, and deployed **3+ production-ready** Flutter mobile applications for Android and iOS using Flutter SDK, Dart, Firebase, and REST APIs.
- Optimized Firestore query execution and listener management, decreasing data synchronization latency by **35%** while improving real-time application responsiveness.
- Architected scalable State Management enhancing application performance by **30%** and minimizing unnecessary widget rebuilds.
- Collaborated in Agile sprints and delivered role-based access systems, reducing development cycles by **20%**.
- Crafted and maintained RESTful API integrations across multiple applications, ensuring reliable data exchange and sustaining **99%+** operational availability.

Flutter Developer Intern – Flutter Studio | Jun 2023 – Dec 2023

- Constructed and enhanced Flutter mobile application features using Dart, contributing to the successful delivery of multiple client projects.
- Integrated Firebase Authentication, Firestore, and RESTful APIs, accelerating feature implementation and improving development efficiency by **25%**.
- Diagnosed and resolved application performance issues through profiling and debugging, lowering crash rates by **40%** and improving user experience.
- Refactored existing codebases using Clean Architecture and MVC principles, increasing code maintainability and simplifying future feature development.
- Collaborated with senior developers during Agile sprint cycles, consistently delivering assigned tasks within project deadlines.
- Implemented reusable UI components and modular code structures, shortening development time for new features across multiple projects.

KEY PROJECTS

Online Doctor Appointment System (PDBC) / *Flutter, Firebase Firestore, Firebase Auth*
github.com/muhammadshafeeq-dev/pdbc-doctor-app

- Strengthened a multi-role mobile application (patient, physician, admin) with real-time Firestore synchronization serving 3 distinct user roles

- Executed dynamic UI rendering for clinical data, health reviews, and physician assessments — reducing manual data entry by **50%**
- Assembled role-based dashboards, filtering systems, and request management workflows using Flutter state management framework for scalable state management
- Linked secure Firebase Authentication with structured backend data handling, achieving zero reported security incidents

MiAuto Car Rental App / *Flutter, Firebase Auth, Firestore, REST APIs*

github.com/muhammadshafeeq-dev/miauto-car-rental

- Built a cross-platform car rental platform supporting vehicle booking, real-time availability tracking, and user management for **100+** vehicles
- Applied Firebase Authentication and real-time database integration, reducing booking confirmation time by **60%**
- Established intuitive UI for vehicle browsing, booking flow, and rental tracking with Material Design principles

Adan Hair Salon App / *Flutter, Dart, Material Design*

github.com/muhammadshafeeq-dev/adan-salon-app

- Expanded an appointment booking system with time-slot scheduling, reducing double-booking incidents by **100%**
- Enhanced responsive UI for service selection and booking management compatible with both Android and iOS

Bible FAQ App / *Flutter, Dart*

github.com/muhammadshafeeq-dev/bible-faq-app

- Created a structured FAQ-based mobile application with categorized content, achieving a 4.5+ star user satisfaction rating
- Designed accessible, user-friendly interface supporting easy navigation across **50+** categorized FAQ entries

EDUCATION

Bachelor of Science in Computer Science

The Islamia University of Bahawalpur

Expected Graduation: 2027

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Flutter & Dart — The Complete Guide (Flutter and Dart official documentation/ self-directed training)
- Firebase for Flutter Developers — Google Firebase documentation & hands-on projects
- Git & GitHub Version Control — practical experience across 4+ collaborative projects
